

## **TECHNICAL DATA SHEET**

# **LARIPUR 6325**

**GENERAL DESCRIPTION** LARIPUR 6325 is a polyester based TPU used e.g. for the injection moulding of technical items, footwear features.

TYPICAL CHEMICAL-PHYSICAL PROPERTIES The following information is not intended to be used as sales specifications.

Parameter		Typical Value	Unit	Method
Specific Gravity		1.24	gr/cm <sup>3</sup>	DIN 53479
Shore Hardness		62	D	DIN 53505
Abrasion Loss		40	mm³	DIN 53516
Tensile Modulus	50%	20.5		
	100%	23.4	N/mm <sup>2</sup>	DIN 53504
	300%	48.9		
Tensile Strength		69.8	N/mm <sup>2</sup>	DIN 53504
Elongation at Break		400	%	DIN 53504
Tear Strength		190	N/mm	DIN 53515
Flexural Modulus		350	N/mm <sup>2</sup>	ISO 178
VICAT Softening Point		156	°C	ISO 306
Torsion Test	+20°C	80	N/mm <sup>2</sup>	DIN 53447
	-20°C	460	N/mm <sup>2</sup>	DIN 53447 DIN 53447
	Ratio +20°C/-20°C	5.7		ל 55447
Impact test	-20°C	4.7	kJ/m²	ASTM D256

This technical note has been written based on our present best knowledge, but the above mentioned data have not to be released as a specification for the material in object.

The properties reported in this Technical Data Sheet are determined on conditioned specimens obtained from injected test plates and represent an average of values gathered from a significant number of production lots.

Even if we guarantee the quality consistency of the LARIPUR products, we could periodically issue updated versions of this Technical Data Sheet and consequently modify the respective sales specifications.

The international standards here indicated have to be intended as a reference to carry out the various tests, but the choice of available options and any possible variation are mentioned in our respective internal standards.

The grades suitable for extrusion are identified with the EG or AE end code and therefore they have to be ordered with such code when used in this application.

The information presented herein is given in good faith but without warranty. It is based on our experience, indicates the findings of our laboratory and does not necessarily indicate final product performance. We cannot be held liable for the results obtained with our products and for any loss or accident that may result from their use. Our suggestions do not release you from the obligation to check their validity and to test our products for both your process and end use application. COIM assumes no obligation or liability with regard to the descriptions and information given or results obtained as production testing and end product performance are under the responsibility of the user. All our products are sold in accordance with our General Conditions of Sale. We do not provide any warranty, express or implied, including but not limited to the merchantability and fitness for a particular purpose or use.

STORAGE AND STABILITY	LARIPUR 6325 is supplied in regular pellet form and it is packaged in 25 kg bags or 500 kg and 1000 kg octabins
	LARIPUR 6325 must be stored in its original and sealed containers and kept in a dry and well ventilated place; avoiding the direct sun radiation.
	The shelf life of LARIPUR 6325 will be 6 months from the date of delivery to the final customer, when stored in its original sealed packaging and in proper conditions
SAFETY	The product is not considered to be dangerous, nevertheless we suggest to read the Material Safety Data Sheet before handling.
PROCESSING RECOMMENDATIONS	Material needs to be dried prior processing at 80-90°C for 3 hours, preferably using a dehumidifying drier fed by air exhibiting a dew point lower than -30°C.
	Suggested moulding temperature profile:

Suggested moulding temperature profile:

Zone	Temperature	
Zone 1	200°C	
Zone 2	205°C	
Zone 3	215°C	
Nozzle	205°C	

Being affected by type of machine used, processing conditions and downstream equipment, the temperature profiles as given above has to be considered as just indicative.
